Home - CALAT
Cooperative learning is an educational approach which aims to organize classroom activities into academic and social learning experiences. . [1] There is much more to cooperative learning than merely arranging students into groups, and it has been described as "structuring positive interdependence."

Traditional Assessment Types: SIOT Independent Study Multiple Choice.
In testing, multiple-choice is the most widely used selection type test, perhaps because these questions can be used to test such a wide range of instructional objectives, are easy to conduct and score, and are less prone to bias and subjectivity (Laprise, 2012). One major weakness of multiple-choice tests besides inviting students to guess at the correct answer is ...
VHL Central | Log in questioning skills to promote their independent learning. 5 (n) Understands communication modes and skills as vehicles for learning (e.g., information gathering and processing) across disciplines as well as vehicles for expressing learning. 5 (o) Understands creative thinking processes and how to engage learners in producing original work.
